

# COLDFUSION 11 UPDATE 3 - ISSUES FIXED

ID	TITLE	Product Area
<a href="#">3728133</a>	Provide status while uninstalling ColdFusion update.	Administrator
<a href="#">3737579</a>	Check for updates' button is not in sync with the notification bulb.	Administrator
<a href="#">3738861</a>	Clicking on "Remove Selected" button in "CF admin > Security > Allowed IP Addresses" gives an error	Administrator
<a href="#">3738871</a>	Updates not displayed correctly in case there are multiple updates available.	Administrator
<a href="#">3741635</a>	[ANeff] Add sentence to "Maximum Number of Cached Queries" description in CF Admin	Administrator
<a href="#">3741641</a>	[ANeff] Archive Wizard step indicators in wrong position	Administrator
<a href="#">3746060</a>	Help document showing CF 10 contents	Administrator
<a href="#">3747483</a>	Clicking on verify button on PDF Services page in the Admin shows the text "YES"	Administrator
<a href="#">3767633</a>	Importing car file from CF 10 into CF 11 breaks installation	Administrator
<a href="#">3811279</a>	CFExplorer not working for ColdFusion Interfaces	Administrator
<a href="#">3816133</a>	System Probe not working. HTTP request returned non-200 status code: Connection Failure	Administrator
<a href="#">3827088</a>	Update DataDirect driver version from 5.1.1 to 5.1.3	Administrator
<a href="#">3712885</a>	Name parameter of cfgridcolumn not honored with JS binding in grids.	AJAX
<a href="#">3712909</a>	Grid pagination does not work with JS binding.	AJAX
<a href="#">3737272</a>	Remove hard coded References to /CFIDE/scripts	AJAX
<a href="#">3741341</a>	CFGrid with groupField attribute set: grouping by a Boolean type column does not display the values for the each group.	AJAX
<a href="#">3741397</a>	Mask attribute of cfgridcolumn not honored.	AJAX
<a href="#">3741675</a>	cfgrid: clicking on the delete button deletes the selected row, but results in an error.	AJAX
<a href="#">3757675</a>	[ANeff] cfmap requires /CFIDE	AJAX
<a href="#">3759630</a>	CFGRID with BIND to CFC failed for an incorrect JavaScript	AJAX
<a href="#">3816340</a>	Image missing in the options in the cfgrid context menu for headers.	AJAX
<a href="#">3741588</a>	ID returned by CacheGetAllIDs() for query objects does not work for cache methods like CacheGet, CacheRemove, CacheGetMetadata, CacheIdExists etc.	Caching
<a href="#">3846185</a>	[ANeff] cacheRemove(cacheGetAllIds()) throws attribute validation exception	Caching

<a href="#">3846186</a>	[ANeff] cacheRemove()'s exact=false behaves as exact=true if exact ID match found	Caching
<a href="#">3849494</a>	CacheRemove throws an exception when one or more queries do not have cacheld attribute	Caching
<a href="#">3788135</a>	CFExchangemail: the "TOID" attribute in the mails retrieved from a mailbox, displays the primary email address even if the mail was sent to an alias.	CFExchange
<a href="#">3788148</a>	CFExchangemail: The CC, BCC, fromID, toID attributes in a retrieved mail do not display the display names.	CFExchange
<a href="#">3756738</a>	cfchart style value works not as before and documented	Charting/Graphing
<a href="#">3756754</a>	cfchart shows legend even when disabled by showlegend="false" in some cases	Charting/Graphing
<a href="#">3756789</a>	CFChart uses space and border for empty title	Charting/Graphing
<a href="#">3798825</a>	CHCHARTSERIES Pie Chart Attribute "datalabelstyle" Has No Effect	Charting/Graphing
<a href="#">3800311</a>	CFCHARTSERIES Data Attribute Will Not Produce Pie Chart According to Documentation	Charting/Graphing
<a href="#">3812163</a>	Passing json file name as style attribute does not show the chart	Charting/Graphing
<a href="#">3816026</a>	showLegend property does not override the property defined in style file	Charting/Graphing
<a href="#">3849389</a>	Issues with pie chart when datalabelstyle is set to columnlabel or pattern	Charting/Graphing
<a href="#">3849267</a>	cfchart : set showLegend attribute to true does not show legend on chart.	Charting/Graphing
<a href="#">3430245</a>	Session gets lost on cflocation width J2EE Sessions and Cookies disabled	Core Runtime
<a href="#">3753710</a>	String member functions break existing code that relies on java.lang.String member functions	Core Runtime
<a href="#">3800047</a>	setEncoding breaks cfile action="uploadall" with some empty file fields	Core Runtime
<a href="#">3842183</a>	cfPrint throws NoSuchMethodError after applying Update 3 PreRelease build	CFPrint
<a href="#">3486968</a>	Add Support for DB2 10 on Linux and Windows	Database
<a href="#">3740190</a>	[ANeff] queryAddColumn() casts to bit when preceded by bit column and QoQ had a prefixed ORDER BY	Database
<a href="#">3765663</a>	QueryExecute ignores scale property in param struct with cfsqltype of 'cf_sql_decimal'	Database
<a href="#">3779331</a>	Query of Query and SQL statements ending in semicolon	Database
<a href="#">3780222</a>	PostgreSQL JDBC driver is so old we cannot use current features in PostgreSQL and self-upgrades beyond 8.3 fail	Database
<a href="#">3808734</a>	Enable dbvarname by default	Database

<a href="#">3738230</a>	cfdump, top, and arrays	Debugging
<a href="#">3760258</a>	Images missing in debug output	Debugging
<a href="#">3811006</a>	cftrace/trace reports incorrect line number	Debugging
<a href="#">3567818</a>	Spreadsheetwrite: autosize does not work to re-size columns with datetime values.	Document Management
<a href="#">3734792</a>	PDFs created by cfhtmltopdf are not accessible/tagged	Document Management
<a href="#">3744503</a>	[ANeff] Bug for: cfhtmlitem doesn't support additional attributes	Document Management
<a href="#">3744504</a>	[ANeff] Bug for: naming inconsistency of page number variables	Document Management
<a href="#">3758430</a>	cfhtmltopdfitem units of margin attributes	Document Management
<a href="#">3800030</a>	Spreadsheetaddsplitpane does not work when a spreadsheet object is added to an existing file using action = update.	Document Management
<a href="#">3795400</a>	<cfzip action="unzip" ... storepath="no"> does not work as expected.	File Management
<a href="#">3724983</a>	java.lang.Double cannot be cast to java.lang.String	General Server
<a href="#">3783403</a>	ExpandPath returns Incorrect path when used with Mappings in Application.cfc	General Server
<a href="#">3845475</a>	Grammar error in error message	General Server
<a href="#">3345396</a>	Updates already applied from console should be restricted from ColdFusion Administrator	Hot Fix Installer
<a href="#">3743165</a>	ColdFusion update checks repeatedly for the status if ColdFusion is configured with an external webserver.	Hot Fix Installer
<a href="#">3743254</a>	After submitting Update URL site, 'Download' and 'Download and Install' buttons do not work.	Hot Fix Installer
<a href="#">3743255</a>	In WebLogic, Dialog box that pops up after downloading the hotfix does show any buttons.	Hot Fix Installer
<a href="#">3760334</a>	Mouse hover to Install button shows text "Download and install"	Hot Fix Installer
<a href="#">3846293</a>	Site URL textbox post CF 11.3 update gets reset to the default value instead of the prerelease update URL	Hot Fix Installer
<a href="#">3772199</a>	Not supported error when installing	Installation/Config
<a href="#">3781603</a>	Ubuntu Not supported in cf-init.run.sh	Installation/Config
<a href="#">3816729</a>	ColdFusion administrator does not load images due to a conflict in web.config	Installation/Config
<a href="#">3846296</a>	Mac 10.10 : Automatic Restart doesn't work after applying Update 3	Installation/Config
<a href="#">3734319</a>	CFIMAP action GETALL breaks when there is an email attachment with square brackets	Java Integration
<a href="#">3041747</a>	t seems that errors raised in onApplicationEnd() and onSessionEnd() won't show up in the CF Application log files	Language

<a href="#">3043855</a>	PATCH is not a supported value for the method attribute for the CFHTTP tag	Language
<a href="#">3489021</a>	Add includeEmptyFields parameter to ReplaceList (as per ListToArray and others)	Language
<a href="#">3748332</a>	CFClient does not support arrayEach() / arrayFilter() / arraySort() / arrayMap() / arrayReduce()	Language
<a href="#">3750734</a>	List iteration & member functions all need to expect both a "delimiters" and a "includeEmptyValues" argument.	Language
<a href="#">3752316</a>	ListChangeDelims() member function missing	Language
<a href="#">3754589</a>	strictNumberValidation setting not reflected in client side CFFORM validation	Language
<a href="#">3754672</a>	Prefix-based custom tags work only if cfimport is used outside of cfsript.	Language
<a href="#">3760802</a>	CFLocation tag when used in default constructor of Application.cfc throws error	Language
<a href="#">3777301</a>	FileUploadAll() does not work with HTML5 <input> multiple attribute	Language
<a href="#">3777403</a>	CFLOOP with simple time values no longer function	Language
<a href="#">3780136</a>	cfimport in cfsript does not work as documented	Language
<a href="#">3783011</a>	Query of Queries giving the wrong result	Language
<a href="#">3818770</a>	Elvis operator executes RHS (right hand side) when it doesn't need to.	Language
<a href="#">3820906</a>	List member function : ListRemoveDuplicates needs to added for list object	Language
<a href="#">3845642</a>	Passing a CFC object with string property value as "yes" or "no" to serializeJSON function converts the values to true or false	Language
<a href="#">3845963</a>	listEach: arguments variable in UDF function (passed to listEach) should contain the information of delimiter and includeEmptyFields	Language
<a href="#">3851922</a>	Elvis operator does not maintain case sensitivity	Language
<a href="#">3842370</a>	Error including file when it is referenced using a ColdFusion mapping pointing to an IIS virtual directory	Language
<a href="#">3335509</a>	[ANeff] ER for: audit.log log Updater installs/uninstalls	Logging
<a href="#">3617930</a>	Included CSS file using link tag are not included in packaged mobile code	Mobile Support
<a href="#">3734606</a>	content:// files error on readAsBase64 (cfclient)	Mobile Support
<a href="#">3737516</a>	REFind gives error when regex containing certain group combination is passed as a pattern	Mobile Support
<a href="#">3738100</a>	Data Structures : struct : duplicate : Get duplicate of struct. Changing the value of referenced struct of its nested struct does not change value of its other nested struct when both nested structs refer to the same struct	Mobile Support

<a href="#">3739334</a>	Data structure : struct : structCount shows unexpected output when keys are "b.d" and "b.c"	Mobile Support
<a href="#">3739782</a>	StructSort doesn't work as expected when sorting is done on nested struct keys	Mobile Support
<a href="#">3742204</a>	cfinclude within <cfclient> should support .html file inclusion	Mobile Support
<a href="#">3754684</a>	Add failure callback handler for invokeCFClientFunction function	Mobile Support
<a href="#">3786749</a>	Upgrade Apache Cordova library to v3.5.0	Mobile Support
<a href="#">3804384</a>	QueryExecute params not working in mobile	Mobile Support
<a href="#">3828377</a>	QueryExecute named params if given as camel casing throw exception.	Mobile Support
<a href="#">3833529</a>	Using index variable inside anonymous function called as a parameter to ArrayEach(Member functions) gives undefined index	Mobile Support
<a href="#">3744211</a>	CFHTTP fails to redirect with POST, PUT, DELETE, or OPTIONS methods	Net Protocols
<a href="#">3763348</a>	CFHTTP not working with some webservers like maps.googleapis.com and it throws a 404 error.	Net Protocols
<a href="#">3796626</a>	CFFTP LISTDIR Command Fails against FTP servers that do not allow the SYST command	Net Protocols
<a href="#">3849151</a>	[ANeff] ER for: Rename CF11HF3's new <cfftp parserkey=""..> attribute to <cfftp systemtype="">	Net Protocols
<a href="#">3835743</a>	ORM: Exception while de-serializing persistent object	ORM Support
<a href="#">3760466</a>	PDF output truncated by ColdFusion/IIS when passing URL parameters	Platform Support
<a href="#">3514766</a>	Problem adding Scheduled Task on system with different Format and Display settings that runs on Java 7	Scheduler
<a href="#">3787631</a>	Axis2 web services can cache unexpectedly.	Web Services
<a href="#">3790251</a>	Unable to connect to web socket over SSL	Web Socket
