COLDFUSION 11 UPDATE 4

RELEASE NOTES

- The build number after applying this update should be 11,0,04,293085 (PreRelease)

- This update addresses 6 important bug fixes, some of them regressions from Update 3. The fixes are mentioned in the Issues_Fixed document.

- As part of bug fix for #3919479, a new JVM flag has been introduced. Setting this flag to true will ensure that existing application code using dbvarname attribute will continue to work without any changes.
