Adobe® FrameMaker® 9.0.4 Read Me

Welcome to Adobe FrameMaker 9.0.4 Read Me. This document contains information about the changes included in this update.

List of changes in this update:

1. Earlier FrameMaker used to crash if *FA_Note_QuitModelessDialog* notification was registered, and user tried to close Cross Reference dialog, Marker dialog or Variable pod. This has been fixed now.

2. *F_ApiSimpleSave ()* now works fine in the *FA_Note_PreQuitBook* Notification.

3. Now FrameMaker should close normally when *FA_Note_DisplayClientXRefDialog* notification is registered.

4. FrameMaker now works fine while executing "Go To Source" command on XRef when *FA_Note_PreGoToXrefSrc* notification is registered.
